

Necessity is the mother of invention, and for Robin Melanson, cool evenings at a mountain resort necessitated a quick-knit cape. Robin was attending the Canadian Superbike Championship (motorcycle races) in Quebec with her boyfriend when she got cold. In just a few days she knitted the prototype for this design (to the awe of the motorcycle types around her) from some mill-end yarn she happened to bring along. Robin works the capelet sideways from center front to center front and shapes it with short rows to taper the neck and flare the lower edge. For this version, she's refined her original wrap by using a fine merino yarn and adding a foldover collar—a sophisticated detail appropriate for more “genteel” occasions.

#### NOTE

- ❖ The body and collar of the capelet are worked from side to side in one piece, beginning at the left front opening and ending at the right front opening.
